Surround sound in one soundbar

7.1.2 Dolby Atmos surround sound with upward-firing drivers. Car chases move across the room. Rain falls from overhead. Whispers land beside you. [1]

Surrounds that get around

Use a pair of Sonos Plays or Move 2s as rear surrounds. When you're done watching, they're portable speakers for the rest of the house. [2]

Made for music too

Fine-tuned with help from GRAMMY and Oscar-winning creators, Beam Ultra brings the same depth, clarity, and detail to music as it does to TV and movies.

Every word, perfectly clear

Dialogue comes through clearly from the moment the TV turns on. When the action gets loud or the room gets noisy, AI-powered Speech Enhancement sharpens every word.

More drivers, more detail

Nine drivers – four more than Beam – reveal more depth in every note and create a wider soundstage.

Tap, talk, or click for control

Control Beam Ultra however feels easiest in the moment. Use your TV remote, the Sonos app, Apple AirPlay 2, Bluetooth, or your voice. [3]

Tech Specs

Tuned to your room

Trueplay™ reads your room's acoustics and adapts the sound for your setup.

Acoustic architecture

9 Class-D amplifiers power 5 tweeters and 4 low-profile woofers

Simulated overhead sound

Optimizes overhead sound effects for when the top of the product is obstructed. Select your setup in the Sonos app.

Box Contents

Sonos Beam Ultra | Power cable | HDMI cable | Documentation
