

Spatial audio like
only Sonos can
do spatial audio

Introducing **Era 300**

SONOS

**Feel
sound
all
around**

Take your spatial audio experience above and beyond

Featuring six optimally positioned drivers all around the front, sides, and top to support Dolby Atmos Music, the breakthrough acoustic design projects sound from wall to wall and floor to ceiling, immersing you in every dimension of the song.

Make the whole room the sweet spot

No matter where you are or what you play, the listening experience is nothing short of extraordinary. Custom waveguides disperse sound right, left, forward, and above, creating a sensationally spacious stereo soundstage you can enjoy all around the room.

Surround sound so real it's surreal

Experience mind-bending multichannel surround sound when you pair two speakers with Sonos Arc or Beam (Gen 2). Supercharged by Dolby Atmos, the lateral and overhead channels in each product create an all-encompassing soundstage to envelop you in the story.

Tunes itself for you

With a tap in the Sonos app, Trueplay™ tuning technology analyzes the unique acoustics of your space and optimizes the speaker's EQ. So all your content sounds just the way it should.

Tech Specs

Four tweeters ensure faithful playback of high and mid-range frequencies.

Two woofers maximize low-end output and are angled left and right to support stereo playback.

Six class-D digital amplifiers precision-tuned for the speaker's unique acoustic architecture power your sound experience.
